

Why Good2Go: Good for business.

Retailers **lose billions every year** from theft, vandalism and drug related expenses in restrooms and dressing rooms. Keeping these areas locked with keys and punch-codes doesn't work, but left open, these high-risk areas are targets. **Automating access is the answer.**

Good for everyone: Simple automated access.

Customer

- Quality in-store experience
- Touchless, healthy and hygienic

Staff

- Improve safety and job satisfaction
- Reduce labor and escalations

Loss Prevention

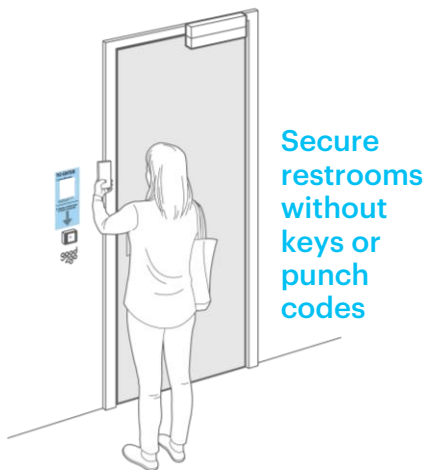

- Eliminate misuse
- Immediate ROI

Corporate

- Protect brand reputation
- Drive profitability

Try it

Scan the QR Code for demo

Step 1

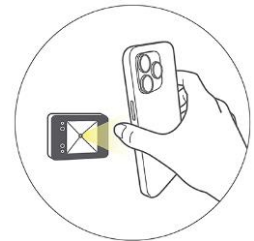

Scan QR code

Step 2

Receive mobile pass

Step 3

Display mobile pass in front of scanner

Prevent restrooms and dressing rooms from becoming cost centers

Good2Have: Cost-effective solution.

Fast, efficient, one-day installation

Pricing Model

- One-time installation fee
- Monthly subscription

Components

- No network required
- Off the shelf hardware

Features

- One-time digital credential
- Single or multi-stall facilities

BGood2Go: Problem solved.

Completely autonomous

Touchless entrance and exit

No app to download

Good2Go pays for itself with reduced crime related expenses, lower labor costs, and increased customer satisfaction. The future of automated access is here.

Good2Go: FAQ

How does Good2Go prevent crime and misuse?

Good2Go's effectiveness derives from the simple act of requiring a personal device to access a secure space. As soon as someone must use their smartphone it drives an immediate change in human behavior. Each user creates a digital fingerprint deterring bad actors.

How is Good2Go more secure than keys and punch codes?

Keys can easily be easily stolen and/or duplicated. Punch codes lack accountability because PINs are commonly over shared. Good2Go's digital credential is a unique mobile pass, can only be used one time, and can't be shared.

What happens if customers don't have a smartphone?

More than 90% of Americans have a smartphone; however, if needed an employee or family member can 'host' someone into a Good2Go restroom with their smartphone. Staff can use a manual key at any time to override.

Does Good2Go require an app to download?

No. Good2Go has a seamless QR-code and web-app functionality that requires no app downloads.

What are the monthly fees and installation costs?

The system fees are \$199 per door, per month:

- \$99 tech support
- \$100 credential usage, minimum charge*

**Covers 1,000 uses. If more are used, it's \$0.10 per digital credential.*

There is a one-time installation fee which varies depending on regional labor costs and desired feature set. Your Good2Go representative will provide the list of authorized installers.

Are there ways to save on installation costs?

Yes, there are three options for installation cost-savings:

- Installations during building construction/renovations can reduce labor costs by up to 40%.
- Eliminating the automatic door reduces the cost by up to 50%. For restrooms, the automatic door is recommended and preferred by customers.
- Meet with your Good2Go representative to discuss current promotions and volume discounts.
